Share.P Sustainable Mobility Solution

Share.P System

City-friendly

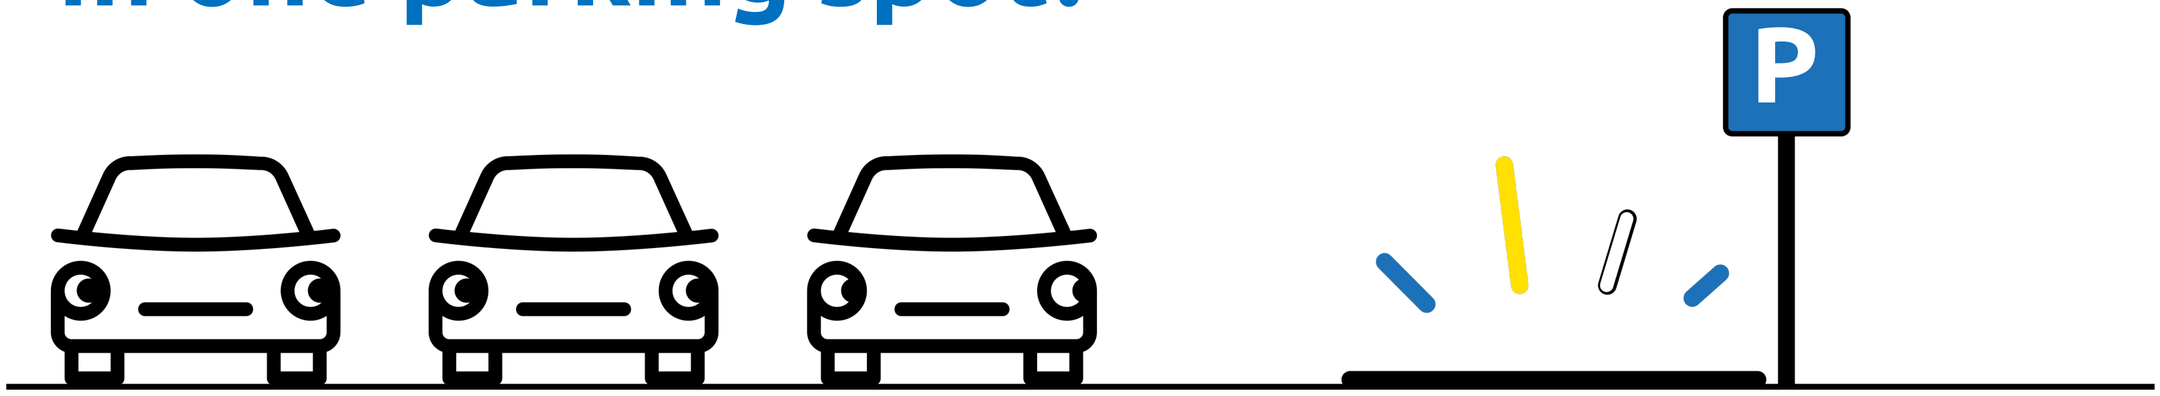
Share.P | How are we eco-friendly?

Our mission is to be a part of the environmental change in our cities.

Let us tell you how we plan to help reducing CO2 emission!

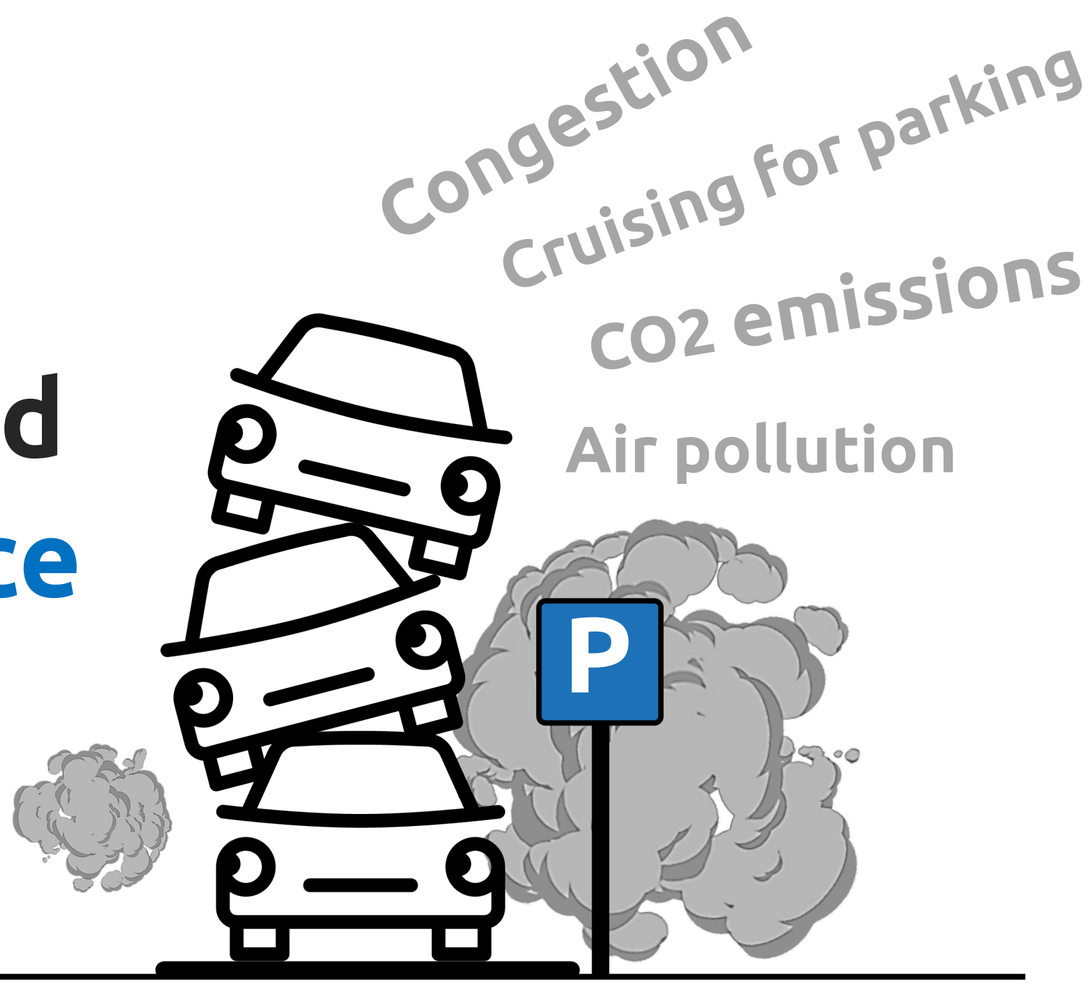
Share.P

How can you squeeze 3 cars in one parking spot?



Share.P

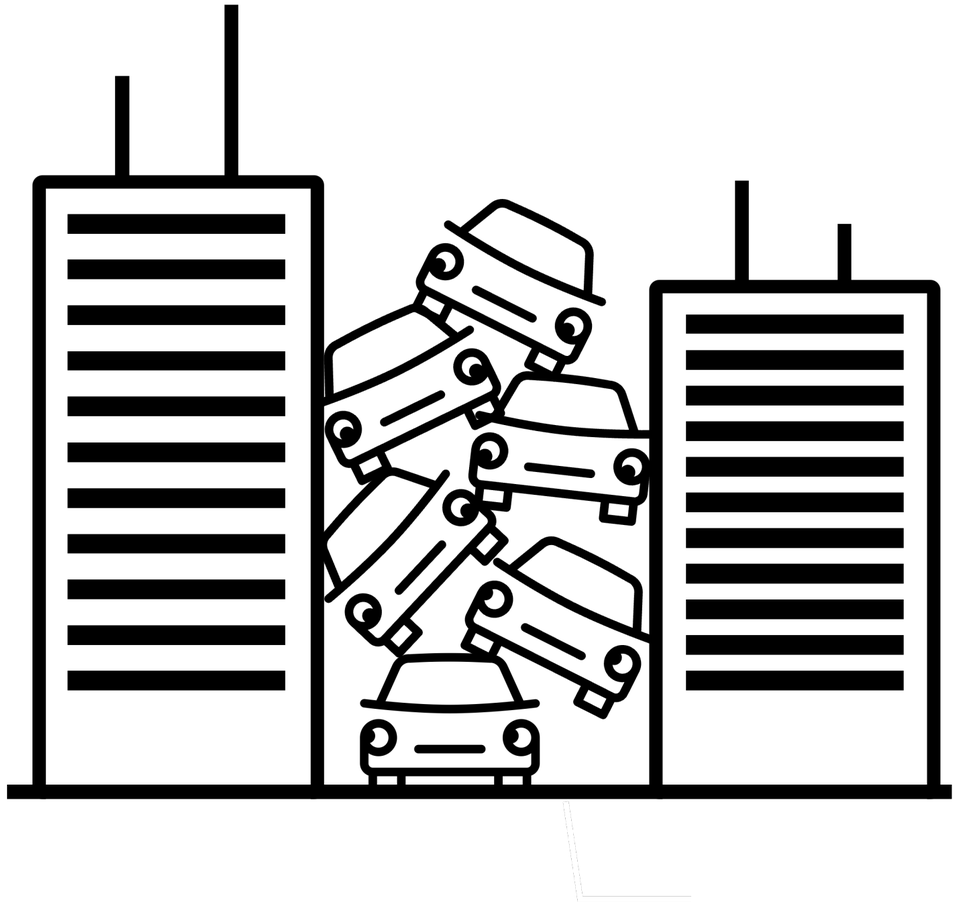
...and what if you had
30’000 cars and space only for 10’000?



Share.P

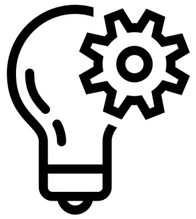
Parking spaces that in average cities owned or managed are only:

11%



What about the other 89% of parking spaces?

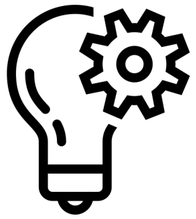
Share.P



They are privately owned and completely defragmented all over every city.

So, what can we do to change that, to free those ON STREET parking spots and eliminate the cruising for parking effect?

Share.P



Instead of building expensive car parks:

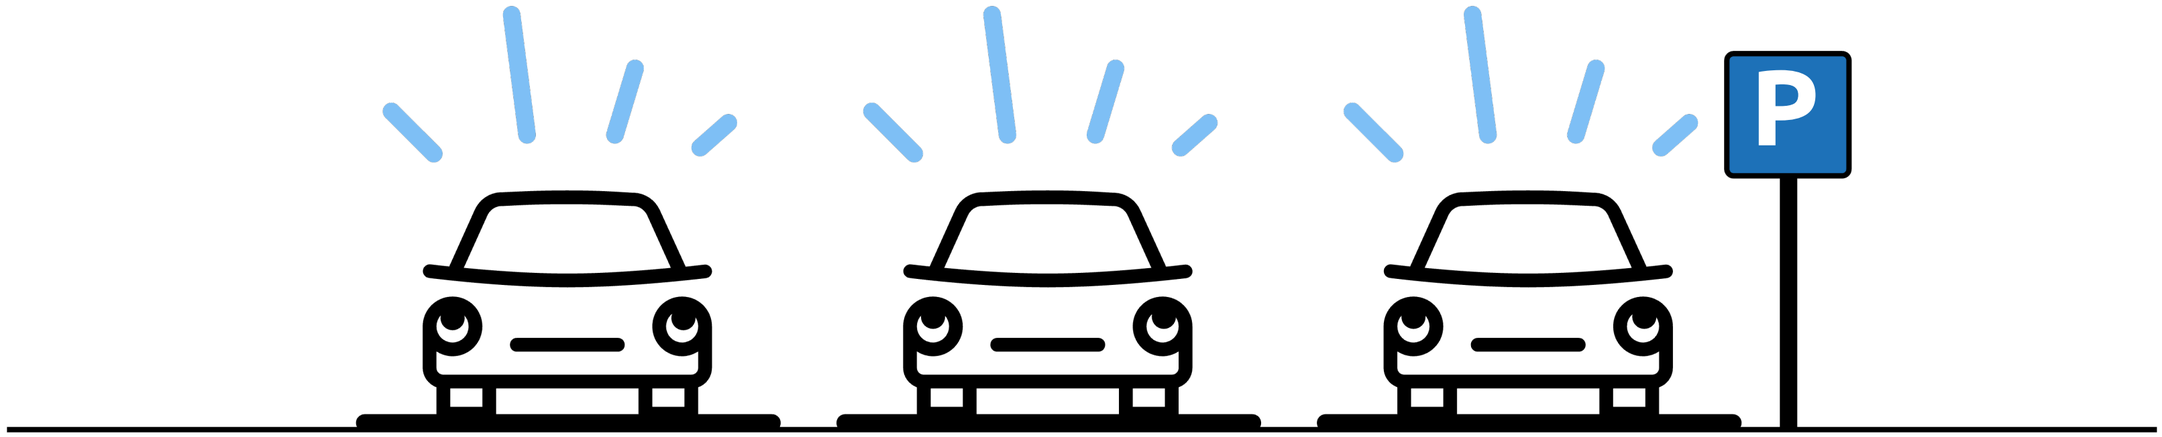
OPTIMISATION OF EXISTING PARKING and EV CHARGING INFRASTRUCTURE

ONE platform ACCESSIBLE for everyone with PreBooking future

How do we do it?

The ultimate Goal

11% → **89%**



Share.P | Profits for everyone

Drivers

No need for unnecessary cruising for parking. Easy and smart way of PRE-booking a spot.

Owners

No parking space waste.
An extra income for every owner.
Alternative sustainable usage of space

City

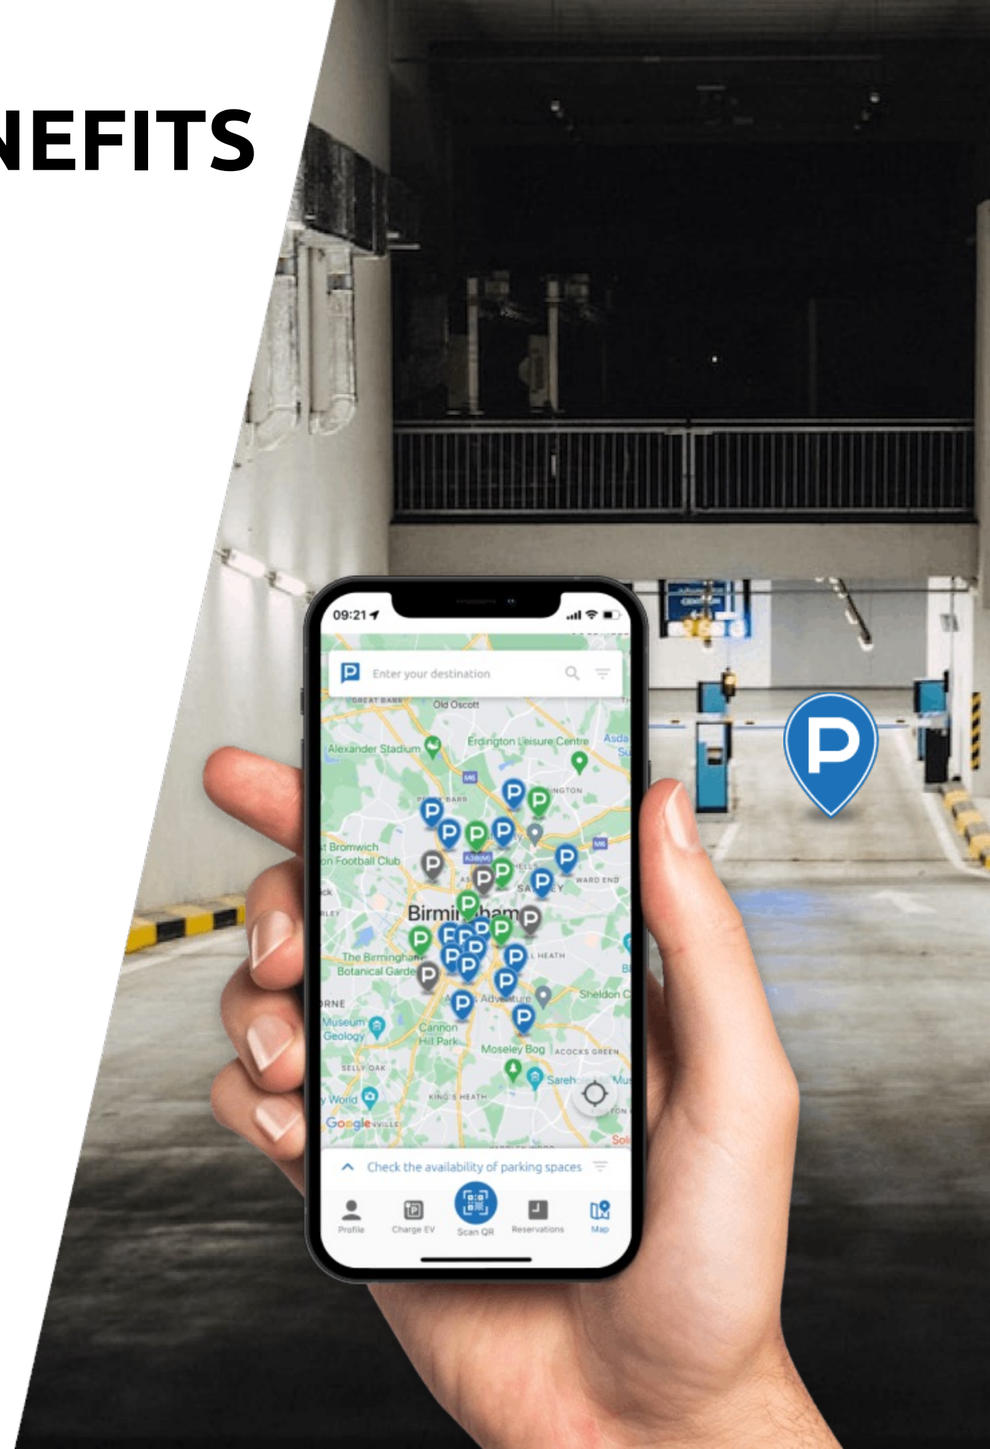
Less on-street parking spots.
Less cars in the city center.

Share.P | IMIDIET SUSTAINABLE BENEFITS

Cities can offer incentives for citizens who share their parking spots and request elimination of spots on the street next to their homes

Cities are informed about the number of parking OFF STREET spots available live

Full automatization of the booking, listing, and parking management process



Solution

Our system allows for a combination of strategies to ensure full customer satisfaction and maximum profits.

We offer multilingual 24/7 support.

User Segmentation

Segment your users into different groups (e.g., employees, residents, visitors, externals etc.) and adapt your prices accordingly.

Easy Reservations

Our reservation system offers you the possibility to pre-book parking spaces. Offer special treatment to visitors by allowing them to access parking spots specifically reserved for them for free via SMS link.

You have the option to open the parking to the public or only to residents.

Find my parking

Attract new customers as they will be able to easily find your parking facility via Google maps, our Share.P app and through our SEO parking guide available in 9 languages.

Easy Access Possibilities

You can choose the right access method for your parking facility based on our different options for quick and smooth access.

Conclusion from Google

*Case study analysis

David Nesseri REWS Director Mateusz Wojdylo ShareP CEO

Parking Analytics

Through the implementation of Share.P's automated access control and management systems for parking spaces, our customers have successfully attained higher levels of security and transparency, increased revenues and received useful reports.

Reservations

- The need for issuing access cards to individual employees for each parking facility access has been eliminated.
- There are no longer any additional costs associated with system integrations.
- No more complaints due to insufficient parking spaces thanks to our efficient booking system.

Employee benefits

- Employees can plan their commute to work.
- Encourages office attendance among employees, thereby enhancing their well-being and achieving a better work-life balance.

Additional benefits

- 25% less management cost
- By implementing a system where employees pay low fees for parking, Google effectively covers the expenses associated with parking management & rental. Employees can book spots only for the time they need.

Share.P™

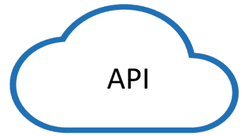
Technology Set-Up

Free mobile APP

Direct communicator for the whole system.

Web based APP

The solution that does not require a registration and app download



Two-way communication with external website and booking platforms

City Parking Occupation Info System

We are sending to the City parking system information about the occupancy of parking spots every 5 minutes

Secured ShareP Servers

Zürich

Er will den Parkplatz-Knorz lösen

Neuartige App Der Pole Mateusz Wojdylo hat sich scheinbar Unmögliches vorgenommen: Er arbeitet daran, die Parkplatzsuche in Zürich zu verkürzen. Dafür riskiert er sein Hab und Gut.

Daniel Schneebeli

Alles begann mit einem Unfall. Mateusz Wojdylo (30) hatte damals bei einem Hotel auf Ibiza in Zürich. Gerne fuhr der IT-Ingenieur aus Polen in der Nähe seines Arbeitsortes mit seinem Auto, sagte sich Gamepher Marius Schmid. Dass seine Geld-Ausgaben für Parkbussen und Parkplätze ausgaben, ...
