

We now consume more than

100BN

tonnes of raw material
every year

91%

Of all materials
are used only once..

40%

of global Co2 emissions are attributable to building operations and building materials”

30%

of all material waste comes from the construction industry.

Stykkka[®]

Next generation interiors
for generations to come

Disposable kitchens has a life expectancy of only 11,2 years in Denmark.

We discard approx. +200.000 units/year.

We do so because:

They are low
quality

They become
obsolete every
5 years.

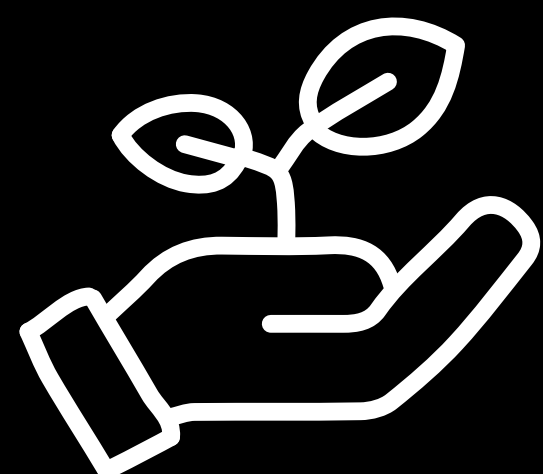

And they are
largely made from
single use
materials

SMART* INTERIORS

Circular and designed to
last a life time

*digitally designed, manufactured, maintained and recycled

Durable

Fully circular with minimal material waste over product life cycle.

Digitally managed

Endlessly upgradable and easy to maintain and manage. While providing a next generation user experience for the enduser.

Circular

Improves your unit economics up to 50% on running costs.

Sustainable,
traceable,
smart,
circular.

Stykkka[®]
Made to matter

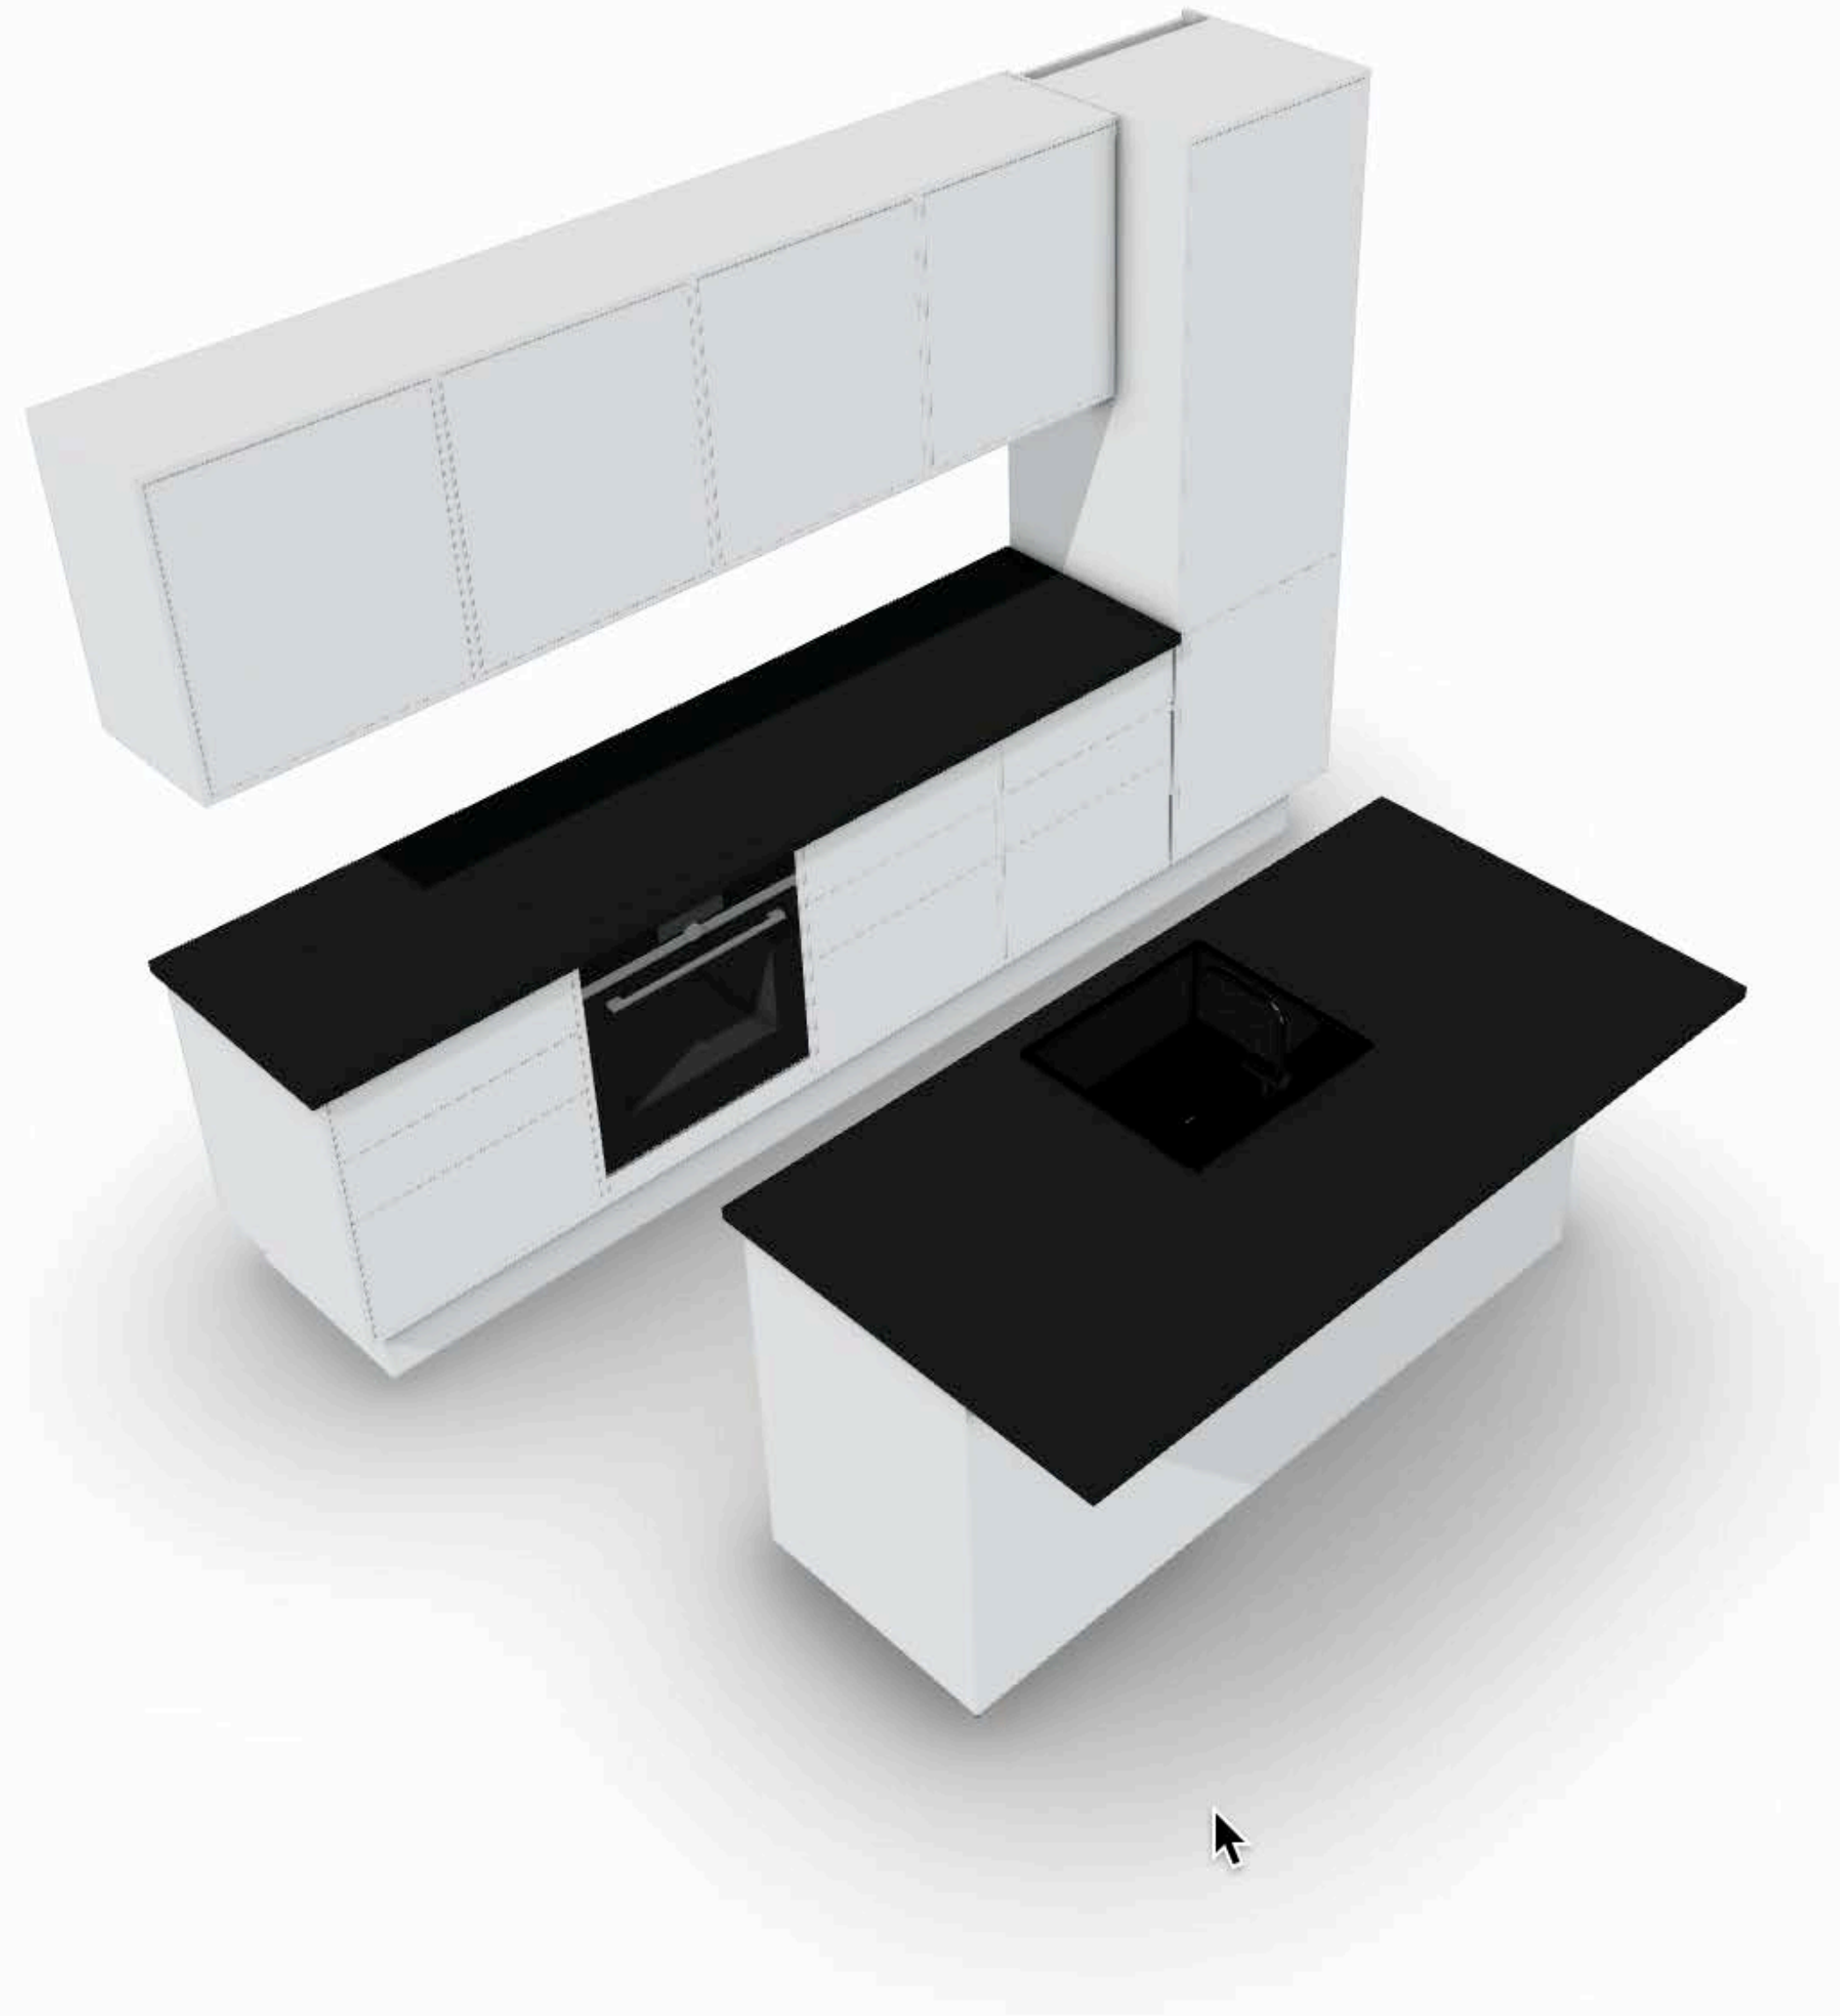

DURABLE MATERIALS

DESIGNED FOR DIS_ASSEMBLY

MADE TO BE RE-MADE

LOWER TOTAL COST OF OWNERSHIP

On a +1800 unit project, our products saves millions of euros as well as millions of kgs of waste.

1820X

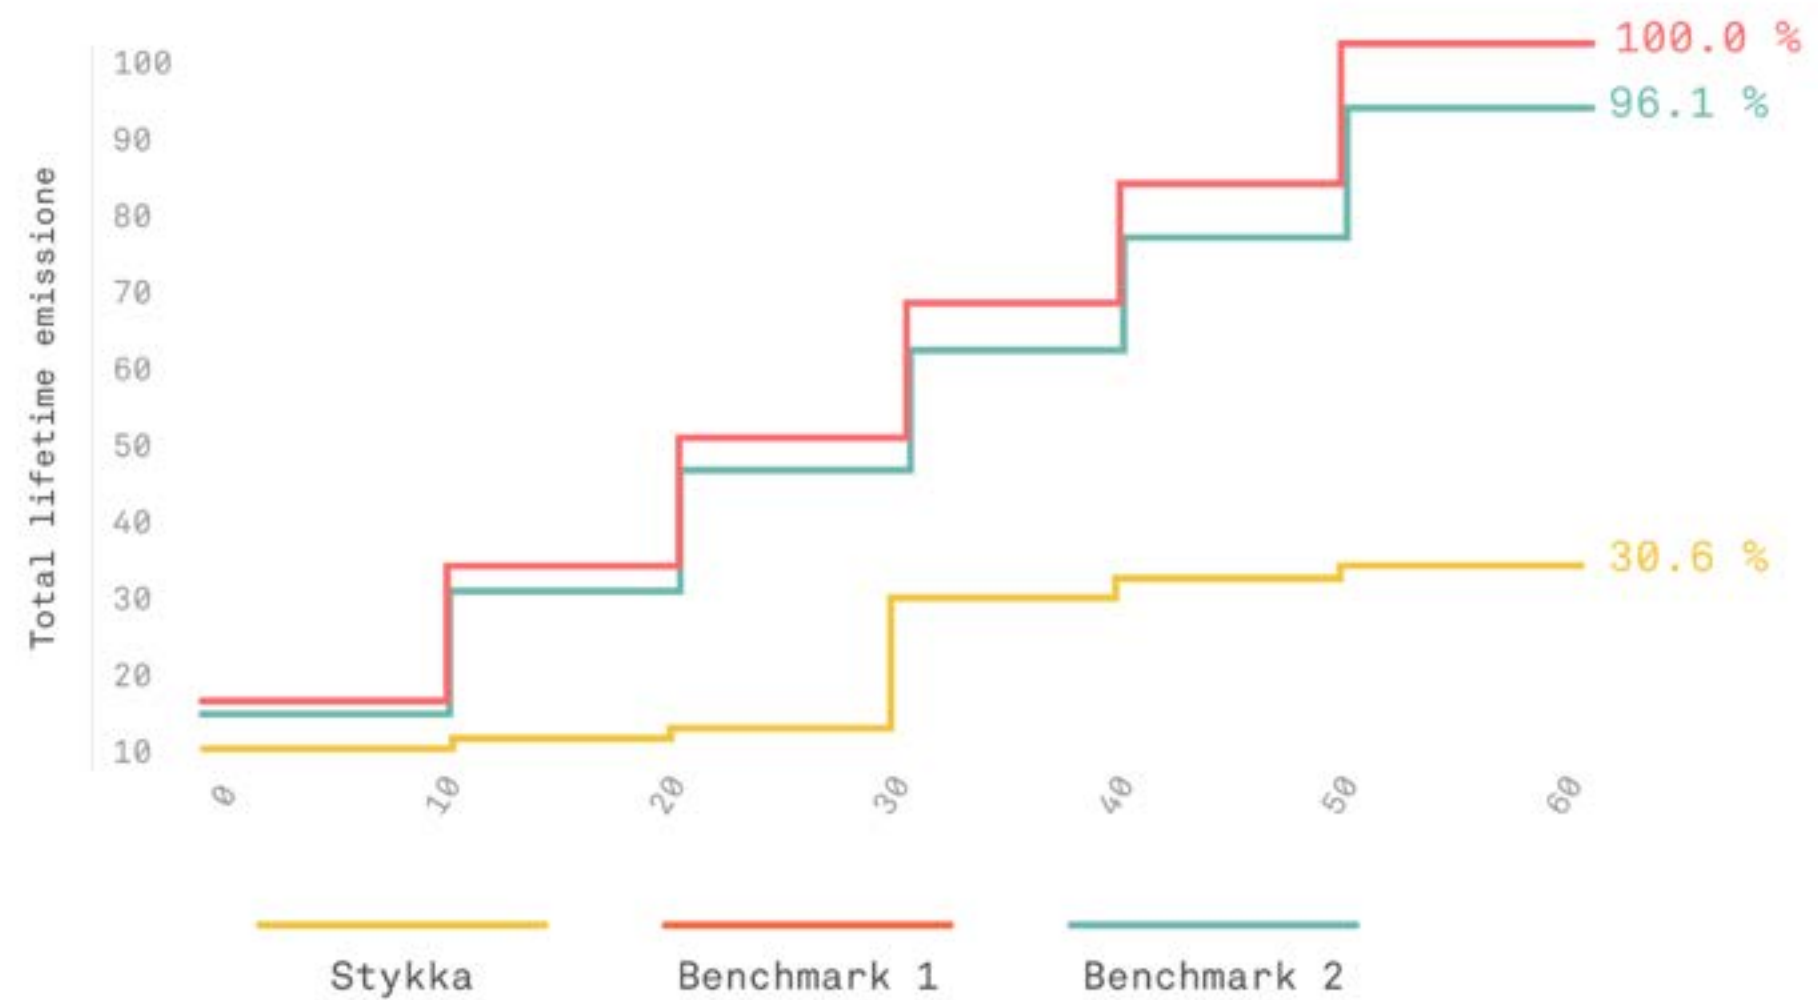

UNITS IN PROJECT

€53M

SAVED OVER A 50 YEAR PERIOD

2.3M KG

POTENTIAL WASTE SAVED OVER PROJECT PERIOD

Avoided emissions - Lifetime Carbon Benchmark, Source Footprint Firm (2022)

Potential of 68-70% emissions saving per kitchen

Initial LCA studies made by the Footprint Firm shows that a Stykka kitchen only emits 30.6% of the CO2 that a benchmark kitchen emits. When compared to revenue it's a saving of 2.524 tonnes of CO2/ 100m DKK Revenue.

6,7

Year ROI - but
build to last 30
years

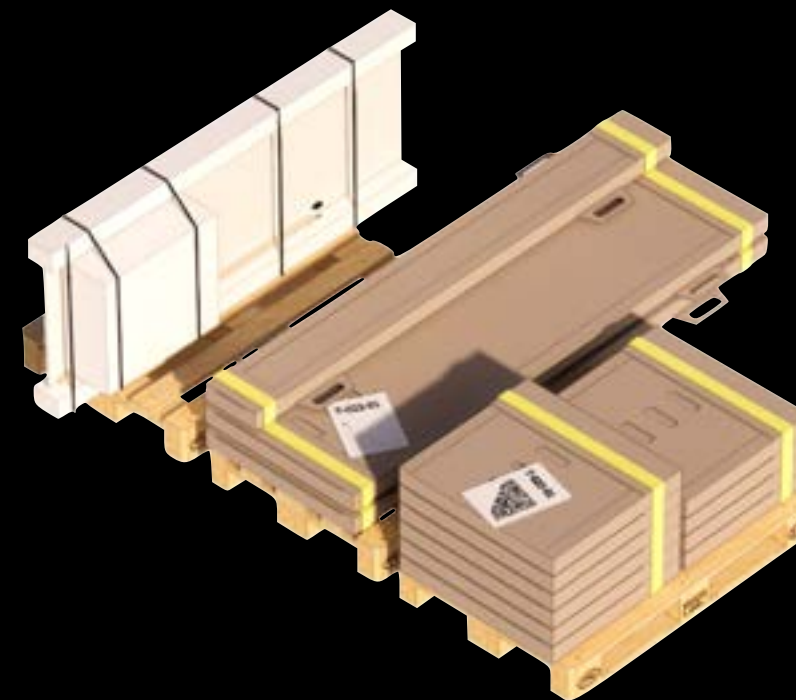

THE PRODUCT

Our kitchen, designed for efficient operations and zero waste. With its solid wood trim, linoleum finish it looks and feels like a high end product, but costs less than €4200 (~€5000 installed)

We've made it super easy to deploy smart interiors, as easy as 1,2,3...

1. Scan unit using app
Use Stykka app to digitize existing apartment

2. Deploy optimized Interiors
Easy turnkey installation of smart interiors through certified installer network

3. Operate and customise through platform
Facility managers and tenants can interact, maintain and upgrade units through platform

In the scale of the
building industry
minutes means millions

At Stykka, we believe in quality over quantity.

Contrary to our competitors who push for frequent product replacements — our approach is different.

We sell you a product once, with the assurance of it being durable and efficient. Our pledge is to keep these products running smoothly, ensuring that your one-time investment continues to serve you well into the future.

Better quality
than many.
More advanced
than any

INSTALLED PRODUCT

IN THE NEWS

BUILD AS ASSET LIGHT — TO SOLVE A GLOBAL PROBLEM

We do not own factories

Our secret sauce is our distributed manufacturing engine, dynamic pricing tools- Enabling us to purchase from multiple vendors.

We do not install products

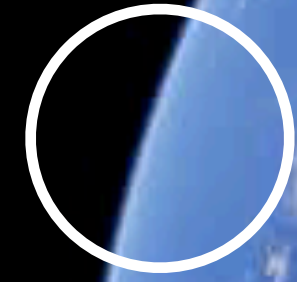

But help our customers through a network of installation partners. Our products are incredible fast and efficient to install.

We control the logistics

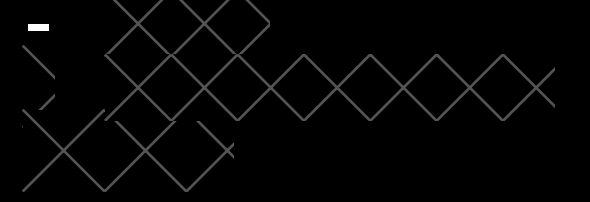

Our secret sauce is our logistics setup and strong focus on tracking of parts.
